HISTORY & BACKGROUND

Almond oil is an extremely popular, all-purpose carrier oil. The almond is a species of tree native to the Middle East and South Asia. It contains vitamins, such as Vitamin E, minerals, protein and Essential Fatty Acids (EFA’s). It is particularly high in the monounsaturated fatty acid called Oleic Acid.

APPLICATIONS

Almond Oil is a rich source of Vitamin E making it an excellent addition to skincare products. The most beneficial qualities of Avocado Oil for skin rejuvenation include increased levels of collagen production deriving from the fact that it can penetrate the skin more deeply, relief of damaged skin caused by sun exposure, treatment of dry skin, and even helping in treating diseases like eczema and psoriasis.

TECHNICAL PROPERTIES

Name: Almond Oil

Botanical name: Prunus amygdalus dulcis

Active ingredient: Oleic Acid (Omega 9), Linoleic Acid (Omega 6, LA)

Appearance: A pale clear yellow oil

Shelf-life: If stored in unopened containers at less than 20 Degrees Celsius, this product can expect to have a shelf life of 12 months

Dosage: Liquid and/or Skincare Formulations.

Typical Almond fatty Acid Profile:

- Stearic Acid: 25.10%
- Palmitic Acid: 2.50%
- Oleic Acid: 63.40%
- Linoleic Acid: 6.40%

Product variations:

- Sweet Almond oil Refined Prunus amygdalus dulcis
